Developer Tools: Google Colab, Visual Studio, PyCharm, Eclipse,Jupyter Notebook
Database Platform: MySQL/Mongodb
Other technology:Git/Github

INTERNSHIPS AND TRAINING

Web Developer Intern — Dec.2022 – Feb.2023
Oasis Infobyte

- During my internship, I worked on real-time web development projects, covering both front-end and back-end, as well as projects using the MERN stack (MongoDB, Express.js, React, and Node.js). I gained practical experience with HTML, CSS, JavaScript, React for front-end, and Node.js, Express.js, MongoDB for back-end. This experience significantly enhanced my technical skills and problem-solving abilities. .

PROJECTS

- **Walmart Market Retail Analysis Using Data Science (Python, Pandas numpy, seaborn, matplotlib)**
This project is used to analyze the retail data of walmert market. It will study the data and predict on which day the sales were more. Github

- **Chrome Extension Project(HTML, CSS, JAVASCRIPT, JSON)**
Developing a Google Chrome extension that fetches a random joke every time a user clicks on it can be a fun and interesting project. Github

- **Currency Converter Project (HTML, CSS , JAVASCRIPT)**
This project is used to convert currency units such as meters to kilometers, inches, and feet. It involves the use of HTML, CSS, and JavaScript to build a currency converter tool that can calculate the equivalent values for different units of measurement. Github

POSITION OF RESPONSIBILITY / EXTRA – CURRRICULAR ACTIVITES

- **Coding Club SNJB**
Active member of SNJB Coding Club, where I apply data structures algorithms to solve real-world problems. Developed problem-solving, critical thinking teamwork skills.
- **Ninja Entrepreneur**
The Coding Ninjas offer a non-technical position where I can perform tasks assigned by them within the organization.
