Objective: -

To work in such an environment that helps me to enhance my knowledge that I can put myself in the way of development of that organization.

Experience: -

Lalit Jangir

Digi-X (Digital channels) support Engineer in Acute informatics pvt.ltd

✦ Experience Summary:-

Highly skilled and motivated Database support with extensive experience in managing and optimizing databases for various organizations. Proficient in database design, implementation, and performance tuning. Adept at handling complex database environments and ensuring data integrity, security, and availability. Strong problem-solving abilities and a proven track record of successfully managing database systems to meet business needs efficiently.

Dedicated Banking Server Handling Specialist with extensive experience in managing server infrastructure tailored for banking and financial institutions.

Designing, implementing, and maintaining databases to support the company's applications and business processes.

Performing database administration tasks including installation, configuration, backup and recovery, monitoring, and troubleshooting.

Optimizing database performance by analyzing query execution plans, identifying bottlenecks, and implementing appropriate solutions.

Ensuring data security and integrity through the implementation of access controls, encryption, and regular audits.

Collaborating with development teams to design efficient database schemas and optimize SQL queries.

Managing database replication, clustering, and high availability solutions to ensure uninterrupted access to data.

Implementing and maintaining database backup and disaster recovery strategies to minimize data loss and downtime.

Conducting regular database health checks and performance tuning to optimize resource utilization and enhance system reliability.

Providing technical support and guidance to other team members on database-related issues.

Keeping up-to-date with the latest trends and technologies in database management and incorporating best practices into the organization's database infrastructure.

This summary showcases my hands-on experience and expertise in database support acquired since July 27, 2023. I have successfully managed and optimized databases to ensure the efficient operation of business-critical applications while maintaining high levels of data security and integrity. My proactive approach to problem-solving and dedication to staying updated with emerging technologies make me a valuable asset to any organization in need of expert database management and support.
