1) Projects Working On

- NACH (National Automated Clearing House)

NACH is a centralised electronic payment service for banks, corporate, financial institutions and the Government. It was set up by the National Payment Corporation of India (NPCI) to introduce best practices in electronic transactions.

➤ MMS (Mandate Management System)

MMS allows banks to accept, digitize, process and send the mandate to other banks for acknowledging and registering customer instruction to debit his account with other bank through NACH. After acknowledging by other bank each mandate is allotted with Unique Mandate Reference Number (UMRN).

➤ ACH - DR (Automated Clearing House - Debit)

An ACH Debit is a type of ACH transfer where funds are pulled from a bank account. That is, the payer (e.g. customer) gives the payee (e.g. merchant) permission to take payment from his account whenever it becomes due.

➤ ACH - CR (Automated Clearing House - Credit)

An ACH Credit is a type of ACH transfer where funds are pushed into a bank account. That is, the payer (e.g. customer) triggers the funds to be sent to the payee.

➤ Legacy (Transactions)

Legacy (Transactions) support a bank's back-end operations across core functions such as transaction processing, deposits processing, loan processing and more.

Technologies used: C#, ASP.Net, Ado.net, Oracle, SQL, HTML, JavaScript.

Client: CITI Bank, Union Bank of India, UCO Bank, PBGB, Bank of Maharashtra, RBL bank, Clix Capital Services, PSIB.
